➤ **Insight-2**

What is the average number of views and comments in Florida from 2006 to 2018?

- **Links:**
**https://public.tableau.com/views/newproject6/averagenumberofviewsand
comments?:language=en&:display_count=y&:origin=viz_share_link**

- **Summary:**
From the graph, it appeared to me that the average views on YouTube were stable and low from 2006 until it rose very high in 2017 (2.596.481) and commented (14.013) and there was a slight view decrease in 2018 (2.022.761) and commented (5.014), which made me search for the reason for the decline, and by searching the Internet, I found that the reason was the emergence of several video platforms by the year 2017. One of them is Facebook Watch, the first competitor to YouTube.

- **Design:**
Line charts display continuous data over time, so they are ideal for showing trends in data in equal time intervals.
*Blue shades were used in all designs of this project, taking into account the color blind.
